1. NATURE AND CONTINUANCE OF OPERATIONS AND GOING CONCERN

Tethyan Resources Plc ("Tethyan", the "Company" or "Old Tethyan") was a public limited company incorporated and domiciled in England for the reporting period. The address of the Company's registered office was 27-28 Eastcastle Street, London W1W 8DH up to July 18, 2019. On August 17, 2017, the Company became a reporting issuer in the provinces of British Columbia and Alberta. In addition, the Company's ordinary shares commenced trading on the TSX Venture Exchange ("TSX-V") on September 6, 2017.

Further to a redomiciling, by way of a scheme of arrangement, on July 18, 2019, Tethyan Resources Plc became a wholly owned subsidiary of Tethyan Resource Corp. ("New Tethyan"), a company incorporated under the laws of the province of British Columbia, Canada. As part of the redomicile, Old Tethyan ordinary shares were exchanged on a one-for-one basis for common shares of New Tethyan and New Tethyan will be accounted for as a continuation of Old Tethyan. Tethyan Resource Corp's registered office is Suite 1200 – 750 West Pender, Vancouver, B.C. V6C 2T8. Tethyan shares trade on the TSX-V under the symbol (TETH), as they had previously.

The Company operations involve acquiring, exploring and evaluating mineral properties in Serbia. The Company has not yet determined whether the properties contain reserves that are economically recoverable.

These condensed consolidated interim financial statements have been prepared on the basis of accounting principles applicable to a "going concern", which assumes that the Company will continue its operations for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations. The Company has not generated any revenues or cash flows from operations. For the six-month period ended June 30, 2019, the Company has incurred negative cash flows from operations of £1,973 and recorded a net loss of £5,945 (six-month period ended June 30, 2018 - £953 and £925, respectively).

The Company expects that it will require additional debt or equity funding in the next 12 months in order to continue its planned exploration and evaluation activities and meet its business objectives. The Company plans to raise the necessary funds primarily through issuance of shares. The Company's ability to continue on a going concern basis is therefore dependent on its ability to successfully raise additional funds. Although the Company has been successful in the past in obtaining financing, there is no assurance that it will be able to obtain adequate financing in the future or that such financing will be on terms acceptable to the Company. These conditions result in material uncertainties that may cast substantial doubt about the Company's ability to continue as a going concern. These unaudited consolidated financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern.

2. BASIS OF PRESENTATION

Statement of compliance

These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard (IAS) 34, *Interim Financial Reporting* as issued by the International Accounting Standards Board (IASB). The unaudited condensed consolidated interim financial statements have been prepared on a basis consistent with the accounting policies disclosed in the Company's audited consolidated financial statements for the year ended December 31, 2018 except as described in Note 3. These unaudited condensed consolidated interim financial statements were approved for issuance by the Company's Board of Directors on August 20, 2019.

Basis of consolidation

These unaudited condensed consolidated interim financial statements include the accounts of the Company and its subsidiaries, as well as its share of 688284 BC Ltd., a shared management services company (joint operation). All intercompany balances and transactions have been eliminated on consolidation.

The principal subsidiaries are:

Entity	Ownership Percentage	Location
Tethyan Resources Plc *(effective July 18, 2019)*	100%	England
Tethyan Resources Jersey Ltd.	100%	Jersey
Tethyan Resources d.o.o.	100%	Serbia
Global Mineral Resources d.o.o.	100%	Serbia
Taor d.o.o.	100%	Serbia
Tethyan Resources Bulgaria EOOD	100%	Bulgaria
Kosovo Resource Company	95%	Kosovo

2. BASIS OF PRESENTATION (continued)

Functional and presentation currency

These unaudited condensed consolidated interim financial statements are presented in Great British Pounds Sterling ("£" or "GBP"), which is the Company's functional currency. Reference to "C$" are to Canadian dollars and references to "€" are to Euros. The Company will evaluate its functional and presentation currency for the third quarter and expects to adopt the Canadian dollar as its presentation currency, as a result of the redomicile of the Company to Canada.

Use of estimates and judgments

In preparing these unaudited condensed consolidated interim financial statements, the judgements made by management in applying the Company's accounting policies and key sources of estimation uncertainty were the same as described in and applied to the Company's consolidated financial statements for the year ended December 31, 2018, except for the new significant judgements related to lessee accounting under IFRS 16, see Note 3.

3. SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies as disclosed in the Company's audited consolidated financial statements for the year ended December 31, 2018 have been consistently applied to the preparation of these unaudited condensed consolidated interim financial statements unless otherwise noted.

Joint arrangements

Tethyan become a party to the joint operation for management and administrative services on February 1, 2019. The following outlines the accounting policy the Company uses to account for Joint operations.

Joint arrangements are arrangements where the Company has joint control, established by contracts requiring unanimous consent for decisions about the activities that significantly affect the arrangements' returns. They are classified and accounted for as follows:

(i) *Joint operation* – when the Company has rights to the assets and obligations for the liabilities relating to an arrangement, it accounts for each of its assets, liabilities and transactions, including its share of those held or incurred jointly, in relation to the joint operation.

(ii) *Joint venture* – when the Company has rights only to the net assets of the arrangement, it accounts for its interest using the equity method.

The Company has an interest in one joint operation relating to a shared management services company (688284 BC Ltd) that provides management and administrative services to Tethyan and other companies. The consolidated financial statements include the Company's proportionate share of the joint operations' assets, liabilities, revenue and expenses with items of a similar nature on a line-by-line basis from the date that the joint arrangement commences until the date that the joint arrangement ceases. These interests are governed by a contractual arrangement whereby rights to assets, liabilities and expenses of the management services company are attributed in proportion to the activity carried out through the arrangement that is directly related to Tethyan. Proportional sharing of costs, assets and liabilities is based on the amount of management services company time spent on each company party to the joint operation.

The Company does not have any joint arrangement that are classified as joint ventures.

Changes in accounting standards

Effective January 01, 2019, the Company adopted IFRS 16, *Leases* ("IFRS 16").

IFRS 16 - *Leases*

IFRS 16 replaces IAS 17, *Leases* ("IAS 17") and related interpretations. IFRS 16 sets out principles of recognition, measurement, presentation and disclosure of leases for both parties to a contract, the lessee and the lessor. IFRS 16 was applied using the modified retrospective approach, under which the cumulative effect of initial application is recognized in retained earnings on January 1, 2019, with no restatement of comparative figures, which continue to be reported under IAS 17. The Company elected to measure its right-of-use assets at amounts equal to the corresponding lease liabilities, which resulted in no adjustment to retained earnings on transition.

(Expressed in thousands of Great British Pounds except share numbers and per share amounts)

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

The Company identified certain leases for office space, which were previously treated as operating leases under IAS 17.

Judgement was applied adopting IFRS 16 to identify contracts within the scope of IFRS 16, evaluating lease renewal terms and determining the discount rate used to present value the lease arrangements. On transition, lease liabilities were measured at the present value of the remaining lease payments under the agreement term, after considering early termination and extension options that were reasonably expected to be exercised. Right-of-use assets are measured at an amount equal to the lease liability, adjusted for any prepaid or accrued lease payments.

Practical expedients applied

In applying IFRS 16 for the first time, we have used the following practical expedients under the modified retrospective approach:

- Recognition exemptions related to short-term and low value leases; and
- An election to not reassess contracts which were previously identified as leases under IAS 17.

Impact on transition

On January 1, 2019, the transition date to IFRS 16, the Company recognized £35 of new right-of-use assets and lease liabilities in the Statement of Financial Position, using a weighted average discount rate of 5%.

The following is a reconciliation between lease commitments disclosed as at December 31, 2018, under IAS 17 and lease liabilities recognized on January 1, 2019, upon initial application of IFRS 16.

		(in '000)
Operating lease commitment as at December 31, 2018 *(Note 11 annual audited financial statements)*	£	86
Discounted using the January 1, 2019 weighted average discount rate		76
Recognition exemption for leases with less than 12 months of lease term at transition		(13)
Termination options reasonably certain to be exercised		(28)
Lease liabilities recognized on January 1, 2019	£	35
Current lease liabilities	£	16
Non-current lease liabilities		19
Lease liabilities recognized on January 1, 2019	£	35

Significant accounting policies amended

As a result of the adoption of IFRS 16, the Company has amended its accounting policy for Leases, from the policy disclosed in the audited annual consolidated financial statements.

Leases

This policy is applied to contracts entered into, or modified, on or after January 1, 2019 and is as follows:

At the inception of a contract, an assessment is made as to whether a contract is, or contains a lease. A contract is, or contains a lease if the contract offers the right to control the use of a specific asset, for a period of time, in exchange for consideration. To determine whether a contract conveys the right to control the use of an identified asset, the following criteria are considered:

- The contract involves the use of an identified asset that is physically distinct or represents substantially all of the capacity of a physically distinct asset. No asset is identified if the supplier of the assets has substantive substitution rights;

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Significant accounting policies amended (continued)

- Whether the Company has the right to obtain substantially all of the economic benefits from the asset throughout the agreement term; and
- Whether the Company has the right to direct the use of the asset and change how and for what purpose the asset is used.

A right-of-use asset and a corresponding lease liability are recognized on the date a leased asset is available for use by the Company. Assets and liabilities arising from the lease determination are initially measured on a present value basis of the following payments:

- Fixed payments, less any lease incentives receivable;
- Amounts expected to be payable by the lessee under any residual value guarantees;
- The exercise of a purchase option if the lessee is reasonably certain to exercise that option;
- Restoration costs; and
- Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

The lease payments are discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate is used to calculate present value. The Company's borrowing rate is the rate that the Company, as the lessee, would pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions. Generally, the Company uses its incremental borrowing rate as the starting point in determining the discount rate, making adjustments based on the lease term, if required.

The lease term determined by the Company is comprised of the non-cancellable period of the lease contract, as well as options to terminate or extend the lease term if the exercise of either option is reasonably certain.

Right-of-use assets are subsequently measured at cost less depreciation on a straight-line basis and reduced to reflect impairment losses (if any) and adjusted for any remeasurement of the lease liability. After the lease commencement date, lease liabilities are measured at amortized cost using the effective interest method, which increases the liability amount to reflect interest on the lease liability and reductions to the lease liability, reflecting lease payments made and also reflects any remeasurement or lease modifications. If a remeasurement to the lease liability is deemed necessary, a corresponding adjustment is also made to the carrying value of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero. Right-of-use assets are depreciated over the shorter of lease term and useful life of the underlying asset.

Payments related to short-term leases and leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss over the respective lease terms. Short-term leases are leases with a lease term of 12 months or less.

New accounting standards and pronouncements

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after December 31, 2019. There are no IFRSs or IFRS Interpretations Committee interpretations that are not yet effective that would be expected to have a significant impact on the consolidated financial statements of the Company.

4. ACQUISITION OF SUBSIDIARIES

On June 29, 2018 the Company completed the acquisition of all of the issued and outstanding shares of a Serbian company (Taor d.o.o) from Dr. Radomir Vukcevic, an executive director of the Company – see Note 7(b).

(a) Suva Ruda

In October 2016, Tethyan signed an option agreement with Deep Research d.o.o ("Deep Research"), a private Serbian company, that gives Tethyan the sole and exclusive right to acquire (the "Option") a license over the Suva Ruda Project in Serbia (the "License") at any time during the total duration of the License and any future extensions of the License (a minimum of 7 years from the date of the option agreement). The License is located in Southern Serbia near the town of Raška, 170 km directly south of Belgrade and within the Raška Ore district. The License comprises one exploration permit with a surface area of 87 km^2. The decision whether or not to exercise the Option during this period is at the sole discretion of the Company. At the time of exercise, the Company must be in compliance with certain work and payment milestones including:

(2) 2,000 meters of drilling completed before December 31, 2016 and a further 5,000 meters of drilling completed before December 31, 2018 in compliance with the agreement.

(3) The amount payable by Tethyan with respect to CAPEX post exercise of the option to acquire the License will be calculated as follows: 4% of CAPEX up to € 200 million; *(up to € 8 million),* 2% of CAPEX between €200 – 500 million; *(between € 4million and €10 million)* and 1% of CAPEX in excess of €500 million.

(b) Taor

On June 29, 2018, the Company acquired all of the issued and outstanding shares of a Serbian company, Taor d.o.o. ("Taor") (the "Transaction"). Taor holds two exploration licenses totaling approximately 100 square kilometers situated adjacent to the Suva Ruda license. The Transaction was accounted for as an asset acquisition. The fair value of the consideration paid was determined and allocated as to Exploration and evaluation assets as follows:

Fair value of consideration			(000's)
Cash paid	*€250,000*	£	221
Shares issued	*12,000,000 x £0.11 (share price on closing date)*		1,320
Transaction cost incurred			47
Total consideration		£	1,588

(c) Gokcanica

In May 2016, the Company executed a Joint Venture and Earn-in Agreement with the Rockstone Group LLC pursuant to which Tethyan could acquire up to an 80% interest in the Gokcanica project licenses in Southern Serbia. On execution of the agreement, the Company paid €0.01 million in cash and issued 194,444 common shares in connection with this agreement. The Gokcanica Permits consist of two adjoining permits with a combined area of 110km^2 located in southern Serbia, 5 km to the north of the town of Josaniska Banja.

On January 14, 2019, the Company terminated the agreement after it decided not to complete the exploration expenditures required under the first of three stages of the agreement.

8. SHARE CAPITAL (continued)

On April 24, 2018, the Company completed a non-brokered private placement of 5,214,500 units at a price of C$0.25 per unit for gross proceeds of C$1,304 (£725). Each unit was comprised of one ordinary share and one-half of one share purchase warrant of the Company. Each whole warrant is exercisable into one ordinary share of the Company at an exercise price of C$0.35 per share for a period of three years from the closing of the private placement. The Company recognized the initial fair value of the 2,607 warrants issued as part of this placement of £157 as a derivative liability. The Company paid finders' fees of C$24 (£13) and issued 94,200 finders' warrants, exercisable at C$0.35 per share for a period of three years. The finders' warrants were recognized as a derivative liability at their fair value of £6.

On June 29, 2018, the Company issued 4,050,000 ordinary shares in connection with units issued on settlement of loans from related parties (see Note 10).

On August 17, 2018, the Company closed a non-brokered private placement for gross proceeds of C$1,500 (£870). The private placement consisted of 6,000,000 units at a price of C$0.25 per unit. Each unit was comprised of one ordinary share and one-half of one transferable share purchase warrant of the Company. Each whole warrant is exercisable into one ordinary share of the Company at an exercise price of C$0.35 per share for a period of three years from the closing date of the private placement. Dr. Michael Andrews, a then director of the Company, purchased 908,000 units and invested C$277 (£166). Under the private placement, the Company paid finders' fees of C$76 (£46) and issued 305,520 finders' warrants, exercisable at C$0.35 per share for a period of three years.

- The Company recognized the initial fair value of the 3,000,000 warrants issued as part of this placement of £165 as a derivative liability.
- The 305,520 finders' warrants were recognized as a derivative liability at their initial fair value of £17.

On January 30, 2019, the Company closed a non-brokered private placement of 16,580,000 units at a price of C$0.20 per unit, for aggregate gross proceeds of C$3,316 (£1,923). In connection with the placement, the Company issued 700,000 finders' units. Each unit comprised one ordinary share and one transferable share purchase warrant of the Company. Each warrant is exercisable into one ordinary share of the Company at an exercise price of C$0.25 per share for a period of five years from the closing date of the private placement. All securities issued in connection with the private placement were subject to a statutory hold period which expired on May 31, 2019. As part of the private placement, Augusta Investments Inc. ("Augusta") subscribed for 11,500,000 units, representing approximately 16% of then the issued and outstanding ordinary shares of the Company. Subject to the terms of an investor rights agreement between Augusta and the Company, Augusta has been granted certain rights including anti-dilution rights, allowing it to maintain its equity ownership interest in the Company.

- The Company recognized the initial fair value of the 16,580,000 warrants issued as part of this placement of £1,254 as a derivative liability.
- The 700,000 finders' warrants were recognized as a derivative liability at their initial fair value of £53.

On January 30, 2019, the Company issued the final 5,000,000 ordinary shares for the Taor Acquisition, see Note 7(b).

On April 17, 2019, the Company closed an underwritten private placement of 6,250,000 ordinary shares of the Company at a price of C$0.80 per common share, for aggregate gross proceeds of C$5,000 (£2,876). The shares issued as part of this placement are subject to a statutory hold period expiring on August 18, 2019. The Company paid a 5.0% cash commission of C$250 (£144) to the Underwriters in connection with the offering. Augusta, a private company beneficially owned by Richard Warke, the Company's Executive Chairman purchased 1,250,000 ordinary shares and invested C$1,000 (£575), bringing Mr. Warke's beneficial ownership to 15.94% of the Company as at April 17, 2019.

In the six months ended June 30, 2019, 263,520 common share purchase warrants with a weighted average exercise price of C$0.35 were exercised and 1,280,000 common share purchase options with a weighted average exercise price of C$0.27 were exercised for total proceeds to the company of C$433 (£251).

(4) On December 30, Southern Arc, a company with two directors in common with the Company (at the time) loaned C$125 (£75) plus a financing expense of 5%, this amount is included in the December 31, 2018 amount payable. The loan was settled on January 31, 2019.
(5) £9 in fees were owed to J. Proust & Associates Inc. for finance, accounting and administrative services as at December 31, 2018.
(6) Five million common shares of the Company were issued to Dr. Radomir Vukcevic, the Company's Executive Director and Vice President Development, in relation to the Taor d.o.o. acquisition (Note 7 b) in the first quarter of 2019. Seven million shares and €250 in cash (£221) was exchanged / paid on closing.

10. RELATED PARTIES (continued)

On January 12, 2018, Dr. Michael Andrews, a then director of the Company (until his resignation in April of 2019) loaned the Company £350 (the "Loan"). The Loan was non-interest bearing and was to mature on the earlier of 6 months from the date of the loan or 5 days following the date on which the Company raised in excess of £1,000 by way of an equity or debt financing with a third party. On June 29, 2018, the Company settled the loan in consideration for 2,450,000 units of the Company. Each unit was comprised of one ordinary share and one-half of one share purchase warrant of the Company. Each whole warrant is exercisable into one ordinary share of the Company at an exercise price of C$0.35 per share for a period of three years from June 29, 2018.

On November 15, 2017, Southern Arc Minerals Inc. ("Southern Arc"), a company with 2 directors in common with the Company (until early 2019) advanced C$400 to the Company pursuant to a convertible debenture financing. The convertible debenture bore interest annually at a rate of LIBOR plus 4% and had a maturity date of May 15, 2018. The convertible debenture was convertible at the option of Southern Arc, into securities of the Company at a share price determined by the share price of the Company's next equity financing subject to Southern Arc not owning more than 29.99% of the total issued and outstanding number of ordinary shares of the Company on completion of the financing and that the conversion price could not be less than the market price of the Company's shares on that date. The value of the conversion feature was not considered material at the date of issuance. On June 29, 2018 the Company settled its C$400 convertible debenture in consideration for 1,600,000 units of the Company on completion of the transaction described in Note 7(b). Each unit was comprised of one ordinary share and one-half of one share purchase warrant of the Company. Each whole warrant is to be exercisable into one ordinary share of the Company at an exercise price of C$0.35 per share for a period of three years. During 2018, Southern Arc exercised 45,051 of the warrants it received in exchange for settlement of accrued interest of £9 owed to Southern Arc related to the loan in November of 2018.

11. CONTINGENT LIABILITIES

Contingent deferred consideration, estimated at £120 related to the Company's acquisition of the Larchland Group during the year ended March 31, 2005 becomes payable to the vendors if either of the following events occur:

(a) the Company discovering a proven deposit of at least three million ounces of gold / gold equivalent at the Pu Sam Cap operation in Vietnam and such deposit having been proven to be capable of extraction by bulk-mining methods; or
(b) a bona fide takeover offer having been made for all of the issued share capital of the Company which values the Company at no less than £133,333.

If either of the above events occur, any liability would be settled by further payment in the form of a share issue equal to the lesser of:

(a) 925,926 Consideration Shares each issued at the market value at the date of issue; or
(b) such number of Consideration Shares as will be equal to 7.5% of the number of Ordinary Shares issued and outstanding at the market value at the issue date.

As the likelihood of these events occurring is presently considered remote, the deferred consideration has not been recognised as a liability.

12. FINANCIAL INSTRUMENTS

The nature of the Company's operations exposes the Company to liquidity risk and market risk, which may have a material effect on cash flows, profit or loss and comprehensive income (loss).

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and to monitor market conditions and the Company's activities. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework and policies.

Liquidity risk is the risk that the Company is not able to meet its financial obligations as they fall due. All of the Company's financial liabilities are classified as current. The Company's approach to managing liquidity risk is to ensure that it will have sufficient liquidity to meet liabilities when due. See also Note 1.

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. Financial instruments that potentially subject the Company to credit risk consist primarily of cash and accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. Credit risk is managed by ensuring that surplus funds are deposited only with well-established financial institutions of high-quality credit standing. The Company assess the collectability and fair value of this receivable at each reporting period. The Company's maximum exposure to credit risk is limited to its cash and cash equivalents and trade and other receivables.

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. The Company is currently exposed to interest rate risk to the extent that the cash and cash and cash equivalents maintained at the financial institutions are subject to a floating rate of interest. The interest rate risk on the Company's cash and cash equivalents is not considered significant. The Company is exposed to foreign exchange risk to the extent that financial instruments are not denominated in the functional currency of the Company or its subsidiaries. Such exposure relates primarily to financial assets and liabilities denominated in Canadian dollars, Serbia Dinars, US dollars and Euros.

As at June 30, 2019, the Company held financial assets of £2,357, £89, £8 and £1 in Canadian dollars, Serbia Dinars, Euro, and US dollars, respectively, and financial liabilities of £5,693, £81, £Nil and £Nil, respectively. A 5% change in exchange rates would change net loss by £303 primarily due to the derivative liability, which is denominated in Canadian dollars.

Fair value

IFRS requires disclosure about fair value measurements for financial instruments and liquidity risk using a three-level hierarchy that reflects the significance of the inputs used in making the fair value measurements. The three-level hierarchy is as follows:

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2 - Inputs other than quoted prices that are observable for the asset or liability either directly or indirectly; and
Level 3 - Inputs that are not based on observable market data.

The derivative liability is measured at fair value using Level 2 inputs. The carrying values of the Company's cash and cash equivalents, trade and other receivables, accounts payable and accrued liabilities and the loan from related party approximate their fair values due to their short term to maturity.

13. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue the exploration and development of unproven mineral properties, and to maintain a flexible capital structure. The Company considers items included in shareholders' equity as capital, which consists of shares issued to its parent company and deficit. The Company manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust its capital structure, the Company may issue new shares or return capital to its shareholder.

The Company currently does not earn any revenue and has relied on existing cash balances, related party loans and equity financing to fund its operations. The Company is currently not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management in the three and six-month periods ended June 30, 2019.
